Association.

The information in this publication is based on the most current nutritional data available at the time of publication and was received from the individual restaurant chains included. Suggested Exchange Values were calculated by an independent nutritional consultant to assure consistency. No endorsement is made of any institution or product by the publisher or by Lilly USA, LLC. Neither the publisher nor Lilly claims to be licensed to give medical advice. The nutrition values (total calories, calories from fat, carbohydrates, total fat, saturated fat, trans fat, cholesterol, sodium, dietary fiber, sugar and protein) listed for each item are for information only and represent typical averages. The listings do not substitute for personalized consultation with your physician and/or registered dietitian. "N/A" has been used in the listings to signify that nutrition information was "not available" for a specific item. Fractions have been rounded to the nearest whole number. Actual nutrition values may differ slightly due to product preparation. Menu items may vary by location and items with limited geographic distribution may not be included. The elimination of specific menu items is due to space constraints only. The publisher is not responsible for typographical errors.

# Introduction

Eating a balanced diet and staying physically active play major roles in good health. Eating healthy is important for everyone. Making wise food choices can help you manage your weight, lower your blood cholesterol, and control chronic diseases such as high blood pressure, heart disease and diabetes.

Being able to select healthy food choices for a proper diet in a variety of situations is a skill that will benefit you for the rest of your life. As an educational service, Lilly has published this condensed edition of *Nutrition in the Fast Lane* to help you make healthy food choices on the go. People with chronic health problems or diseases should consult their doctor and registered dietitian for individual needs.

Nutrition concerns should not be left at home when you are dining out. Restaurant meals, even fast food, can provide some very good choices for a balanced diet. But, just like other food, it can also be loaded with calories, fat, cholesterol and sodium. Your copy of *Nutrition in the Fast Lane* will enable you to apply the same sound judgement when you dine out as you would when you eat at home. Choose your selections carefully!

## How to Use This Booklet

These three basic guidelines of good nutrition apply to nearly everyone: 1) eat a balanced diet; 2) choose foods low in fat, especially saturated fat, trans fats and cholesterol; and 3) avoid high levels of sodium.

This booklet gives you nutrition facts on more than 1,000 menu items offered by 26 of the most popular national fast-food and casual dining chains. Restaurants are listed in alphabetical order. At the top of each restaurant page are guides to nutrition facts about each menu item. The following illustration is an example of a menu item from a restaurant in this booklet.

	TOTAL CALORIES	CALORIES FROM FAT	TOTAL FAT (gm)	CHOLESTEROL (mg)	SODIUM (mg)	CARBOHYDRATE (gm)	PROTEIN (gm)	TOTAL CARB EXCHANGE	SUGGESTED EXCHANGE VALUE
Hamburger Portion: 1 sandwich	260	80	9 Sat Fat 3½ Trans Fat <1	30	530	33 Fiber 1 Sugar 7	13	2	2 Starch 1 MF Meat 1 Fat

To keep this simple, it might be helpful to review the meaning of the column guides.

**TOTAL CALORIES** — The bigger your body, the harder it must work, and the more calories you will need. Additionally, gender, age and activity level all play an important part in these requirements. For instance, males need more calories than females, younger adults need more than seniors, and more strenuous activities require more calories to burn for energy. To determine your specific calorie needs, you should consult a registered dietitian. Generally, pre-teen children, inactive females of all ages and moderately active older women need 1,600–1,800 calories a day. Boys in their early teens require 2,200–2,400 calories a day, as do inactive males and very active

females until they reach the age of 60–65. Most active men need 2,800–3,000 calories a day, with very active 16–18 year old boys needing slightly more (3,200 calories). Active women 16–60 and men over 50 should find that 2,000 calories daily will suffice.

**CALORIES FROM FAT** — When watching your diet, knowing the number of calories coming from fat can help you to quickly make a healthier choice.

**TOTAL FAT, SATURATED FAT & TRANS FAT** —

Fat is a major source of energy. It insulates the body and aids in the absorption of certain vitamins. When eaten in moderation, fat is important for proper growth, development and maintenance of good health. However, too much fat can contribute to obesity, high cholesterol and heart disease. This is especially true of saturated fat and trans fat. Total fat should not exceed 30% of the total calories consumed. Saturated fat should be less than 10% of total calories with trans fat consumption kept as low as possible. Fats yield 9 calories per gram.

**CHOLESTEROL** — All dietary cholesterol comes from animals. The main sources are egg yolks, meat, poultry, shellfish and dairy products. Studies show high blood cholesterol levels contribute to heart attacks and stroke. Nutritionists recommend keeping dietary cholesterol at less than 300 milligrams daily.

**SODIUM** — Sodium exists naturally in some foods. It also is used as a preservative to increase the shelf-life of many fast-food items. In addition, it is added during cooking and at the table in the form of salt. Consuming less than 2,300 milligrams of sodium per day is recommended.

**CARBOHYDRATE** — This is the body's preferred energy source and is derived from sugars and starches. Some sugars occur naturally, while others are added during processing; starches occur naturally in most vegetables, grains, fruits, etc. High carbohydrate foods include fruit, milk, sugars and starchy foods such as breads pasta and potatoes. Carbohydrates supply 4 calories per gram.

**Dietary Fiber** — Fiber plays a role in supporting bowel regularity and also helps to maintain normal cholesterol and blood sugar levels. High-fiber foods include fruits, vegetables, beans, whole grains, whole-wheat breads and cereals. A goal of 14 grams of fiber per 1,000 calories consumed is recommended.

**Sugar** — All food provides calories. All calories provide energy. But not all calories come with a full complement of extra benefits such as amino acids, fatty acids, fiber, vitamins and minerals. Natural sugars in fruits and milk contain some of these extra benefits. However, desserts, candy, syrups and jellies/jams contain the "empty" calories of added sugar and should be avoided.

**PROTEIN** — Proteins are the body's building blocks and are needed for the growth and maintenance of muscle and body tissues. Meat, beans, nuts and dairy products are high in protein. Proteins supply 4 calories per gram.

**TOTAL CARB EXCHANGE** — Starch is in bread, cereal, pasta, potatoes, beans, peas and lentils. Natural sugars are in fruits and milk. Desserts, candy, syrups and jellies/jams all

contain added sugar. These starches and sugars are carbohydrates and can be exchanged for each other. Eating the same amount of carbohydrate daily at meals and snacks can help an individual with diabetes control blood glucose levels.

**SUGGESTED EXCHANGE VALUE** — The exchange system is a method of meal planning developed by The American Dietetic Association and The American Diabetes Association. It promotes control of portion sizes, calories and the amounts of carbohydrate, protein and fat that are eaten daily. Foods within a particular group can be traded or “exchanged” for each other.

The exchange lists divide all foods into three main groups 1) CARBOHYDRATE (fruits, starches, milk, vegetables and other foods high in carbohydrates such as desserts); 2) MEAT & MEAT SUBSTITUTES (high-protein food such as meats, cheeses, chicken, fish and beans. Further grouped to easily identify the healthier choices: Plant-Based Protein “PB Protein” (normally referenced, with exceptions, as Lean Meat); Lean Meat “L Meat”; Medium Fat Meat “MF Meat”; High Fat Meat “HF Meat”); and, 3) FAT (butter, margarine, mayonnaise, oils, salad dressings, etc.).

The exchange system is helpful because it shows you how many calories something has and where those calories are coming from. For example, a food item that contains 120 calories could be from either a healthy choice like fruit or it may all be from fat. With the help of the exchange values, you can identify high-fat foods and eat those sparingly.

Some items are labeled “free” in the exchange system. A free food is a food that has less than 20 calories, or less than 5 grams of carbohydrate per serving. These foods should be limited to no more than 3 servings per day.

Healthy eating not only involves selecting a good quality of food, but also an appropriate quantity. The total number of servings from each of the food groups depends on your personal needs.

A registered dietitian can help you design a meal plan that will help you accomplish your personal nutrition goals such as cutting back on fat, losing weight, controlling blood glucose levels, or simply improving your eating habits. You can find a registered dietitian in your area by calling the Nutrition Hotline of The American Dietetic Association at 1.800.877.1600/[www.eatright.org](http://www.eatright.org).

## Dining in the Fast Lane

The American Heart Association recommends that less than 30% of the calories we eat should come from fat. However, healthy dining is not only limited to eating healthy items, it also requires consuming appropriate portions of the items you choose. How much is eaten is every bit as important as maintaining a healthy balance.

In addition, eating less fat may contribute to weight loss as long as you don’t overeat “low-fat” foods. It is not beneficial to eat low-fat foods if you tend to eat 2-3 times more just because they are “low-fat.” For example, it is not healthy to buy fat-free cookies and eat the whole box in one day. The basic fact is that if you eat more calories than your body can use (fat-free calories or high-fat calories), you will gain weight.

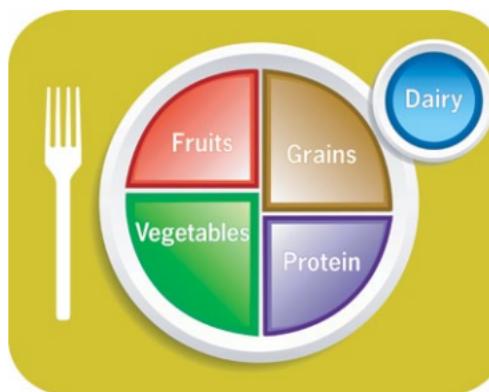

In general, a balanced diet consists of less than 30% fat, between 50-65% carbohydrate and 10-20% protein. However, people with chronic health problems or diseases should consult their doctor and registered dietitian for individual needs.

The following meals were planned based on the American Heart Association's fat recommendations and the American Dietetic Association's guidelines for carbohydrate intake.

In an effort to give you a variety of daily menus from which to choose, each menu gives you three selections from each daily meal. These selections are interchangeable and are equal in carbohydrate (50%-65%), protein (20%) and fat (<30%). You may wish to substitute an item to suit your individual taste. If you do, be sure to choose an item with approximately the same or fewer calories, or the same or less carbohydrate, protein and fat. (*Check the values of your choices later in this booklet.*)

## CHOOSEMYPLATE.GOV

### Nutritional Recommendations from the USDA

The MyPlate icon graphically illustrates the relative portions of the five major food groups recommended for each meal. Emphasis is placed on at least half of the meal consisting of fruits and vegetables while limiting the amount of protein (meat, eggs, beans, etc.). At least half of grain products should be whole grain. When creating your meal plan, prefer foods with little or no solid fats or added sugars. Choose

dark-green, red or orange vegetables, low-fat or fat-free milk products, and lean meats, poultry or fish. Replace sugary drinks with water or unsweetened tea.

Vary your routine by incorporating more fish, beans, peas, nuts and seeds. Variety using a wide range of brightly colored fruits and vegetables will help ensure a complete complement of vitamins and minerals.

**The following chart presents general nutritional requirements by age and gender for individuals who exercise less than a half hour per day beyond daily living activities. Height, body-build and a more strenuous daily exercise regimen should also be taken into consideration when developing your own meal plan. Servings of food from the basic food groups and oils are presented in standard measures as would be used during cooking or at the dinner table. Where applicable, measurements are presented after the cooking process.**

	AGE	CALORIES	VEGGIES	FRUITS	GRAINS	PROTEIN	DAIRY	OILS

Egg McMuffin

## LUNCH

**WENDY'S**  
Apple Pecan Chicken  
Salad w/Pomegranate  
Vinaigrette  
Dressing (4 tbsp)

**SUBWAY**  
Veggie Delight Salad  
w/o Croutons w/Fat-Free  
Italian Dressing (1 pkt)  
6-inch Oven-Roasted  
Chicken Breast Sub  
w/Standard Vegetables

**CHICK-FIL-A**  
Chargrilled Chicken  
Cool Wrap  
Fruit Cup (large)

## DINNER

**KFC**  
Caesar Side Salad w/  
Fat-Free Drsg. (2 tbsp)  
Original Chicken Breast  
Mashed Potatoes w/Gravy  
Green Beans  
Corn-on-the-Cob (3-inch pc)  
Biscuit w/margarine (1 pat)

**BOB EVANS**  
Specialty Garden Side Salad  
w/Oil & Vinegar Drsg.  
Garlic-Buttered Salmon  
Broccoli Florets  
Green Beans  
Fruit Cup  
1 Dinner Roll w/marg. (1 pat)

**FAZOLI'S**  
Grilled Chicken &  
Artichoke Salad w/  
Lemon Basil Drsg.  
Ravioli in Marinara  
Sauce  
1 Dry Breadstick

# 2,200 CALORIE MENU

Most Children, Teenage Girls, Active Women and Many Inactive Men

## BREAKFAST

**HARDEE'S**  
Frisco Breakfast S'wich  
Hash Rounds (1/2 order)

**DENNY'S**  
Scrambled Egg Beaters  
Grl. Honey Smoked Ham (1 slice)  
Hash Browns (plain)  
1 Btrmlk. Biscuit w/marg. (1 pat)

**ARBY'S**  
2 Ham & Cheese  
Croissants

## LUNCH

**SUBWAY**  
Subway Club Salad w/  
Fat-Free Italian  
Dressing (1 pkt)  
6" Cold Cut Combo

**McDONALD'S**  
Side Salad w/LF Italian Drsg.  
Chicken McNuggets (6-piece)  
w/Honey Mustard Sauce  
Fruit & Yogurt Parfait

**TACO BELL**  
3 Crunchy Tacos –  
Fresco Style  
Pintos 'N Cheese

## DINNER

**GOLDEN CORRAL**  
Sirloin Steak (4 1/2 oz pc) W/  
Sautéed Mushrooms  
BBQ Pork (3 oz piece)  
Escalloped Apples (1/2 cup)  
Brussel Sprouts (1/2 cup)  
Broccoli (1/2 cup) w/  
Cheese Sauce (2 oz ladle)  
Skillet Cornbread (2 oz piece)

**ARBY'S**  
Chopped Turkey & Ham  
Salad w/ Balsamic  
Vinaigrette Drsg. (1 pkt)  
Arby's Melt  
Potato Cakes (2-piece)

**PANERA BREAD**  
LF Gdn. Vegetable Soup  
w/Pesto (12 oz. bowl)  
Greek Salad w/Greek  
Dressing  
1/2 Café Sandwich –  
Smoked Ham &  
Swiss on Rye

# 2,800 CALORIE MENU

Teenage Boys, Many Active Men and Some Very Active Women

## BREAKFAST

**MCDONALD'S**  
Sausage McMuffin  
w/Egg  
Hash Browns (1 patty)

**BOB EVANS**  
Fruit Cup  
3 Scrambled Eggs  
Smoked Ham (1 slice)  
Home Fries

**BURGER KING**  
Cheesy Bacon BK  
Wrapper  
Hash Brown Rounds  
(sm)

## LUNCH

**LONG JOHN SILVER'S**  
2 Fish Value Basket  
(2 fish, 2 hushpuppies & fries)  
Lobster Stuffed Crab  
Cake (1 piece)

**KFC**  
Doublicious Sandwich w/  
Grilled Filet  
BBQ Baked Beans  
Cole Slaw  
Green Beans  
Potato Wedges (sm)

**PAPA JOHN'S**  
2 Spicy Buffalo Wings  
w/Ranch Dipping  
Sauce (½ cup)  
Original Crust Sausage  
Pizza (2 slices)  
1 Breadstick

## DINNER

**DENNY'S**  
Bcn. Chptl. Chkn. Skillet  
Green Beans  
Sliced Tomatoes  
Corn in Butter Sauce  
Dippable Veggies w/  
LF Ranch Dressing

**CHILI'S**  
Caribbean Salad w/Grilled  
Shrimp & Dressing  
Grl. Salmon w/Garlic & Herbs  
Seasonal Veggies  
Black Beans w/  
Pico de Gallo

**BOB EVANS**  
Open-Faced Roast Beef  
w/Mashed Potatoes  
Broccoli Florets  
Green Beans  
Glazed Carrots  
Fruit Cup

**PLEASE NOTE:** It is suggested that you drink water, diet drinks, unsweetened tea or coffee with your meals since all are both calorie-free and carbohydrate-free. It is further suggested that if you eat at fast-food establishments often, you should supplement your diet each day with a snack of fruit (apple, banana), dried fruit (raisins, prunes, banana slices, etc.) or vegetables (broccoli, carrots, celery sticks, etc.) with fat-free dipping sauces to increase your body's intake of vitamins, minerals and dietary fiber.

## Exercise is Important, too

Regular physical activity is also an important ingredient for continued good health. Aerobic exercises are the best choice because they make your heart and lungs stronger. They also use more calories and burn more fat than other kinds of exercise.

Walking may be a good way to start being more active. It's convenient and low cost. You can walk anywhere—in a shopping mall, local park, or in your neighborhood. Walking also can be a relaxing social activity. You can enjoy the company of others while you get the exercise you need.

You should exercise at least 30 minutes per day of moderate physical activity to get the most health benefit. This is in addition to the normal activities of independent living. A person doing moderate exercise should feel some exertion but should be able to carry on a conversation comfortably during the activity. Regular exercise may help you control your weight, increase your strength and ease of movement, and reduce stress.

It is important that you choose an activity that is right for you and one that you will enjoy. What you like to do and your current level of physical fitness play a big part in choosing the right activity.

Consult with your health care provider before beginning any exercise program. If you need more help in planning a healthy exercise plan, you may want to talk to an exercise physiologist, who is an expert at prescribing exercise.

## CALORIES BURNED DURING COMMON ACTIVITIES

ACTIVITY	CALORIES PER MINUTE	CALORIES PER HOUR
<b>Moderate Physical Activity</b>		
Stretching	3	180
Weight lifting ( <i>general light workout</i> )	3½	220
Walking (3½ mph)	5	280
Cycling (less than 10 mph)	5	290
Dancing, golfing ( <i>pulling cart</i> ), light gardening/yard work	5½	330
Hiking	6	370
<b>Vigorous Physical Activity</b>		
Heavy yard work ( <i>chopping wood</i> ), Weight lifting ( <i>vigorous effort</i> ), Basketball ( <i>vigorous</i> )	7	440
Walking (4½ mph)	7½	460
Aerobics	8	480
Swimming ( <i>slow free-style laps</i> )	8½	510
Running/jogging (5 mph), Cycling (more than 10 mph)	10	590

## In Conclusion

Staying healthy isn't just about eating the right foods and avoiding too much fat, saturated fat, trans fats, cholesterol, sugar and sodium. You should also remember to keep a healthy weight, exercise regularly and take medication as prescribed by your doctor.

We hope that *Nutrition in the Fast Lane* will be helpful to you. It should fit conveniently in your purse, pocket or the glove compartment of your car. Carry it with you and use it often to help you maintain your health while making the most of your life in the fast lane.

\*Any menu item may be ordered "Fresco Style" which replaces that item's traditional sauce or cheese with Fiesta Salsa (a zesty blend of tomatoes, onions and cilantro). Due to space constraints, Adjustments are presented for Gorditas and Chalupas as samples. From the data presented for the item chosen, add/subtract the variations presented directly below the style. Other menu items will carry similar variations.
